DSPi – enclosure lid sticker

Print at ACTUAL SIZE (100 %, no "Fit to page"). Check with the scale bar below: it must be exactly 50 mm.
Cut along the corner marks – the colour bleeds 2 mm past the cut, so small inaccuracies do not matter. Main sticker 50.8 × 40.8 mm, button strip 27.8 × 7.4 mm (apply after fitting the buttons). Spare copies in case of a bad cut.

50 mm scale bar

Tip: print on self-adhesive photo paper or vinyl; varnish matte paper or cover it with clear film.
Page 2 shows the placement on the lid (also 1:1 – you can cut it out and use it as a template).

Placement on the lid (1:1, top view, front edge at the bottom)

Main sticker: 10 mm from the left edge of the lid, 2 mm from the back edge. The USB arrow then points at USB, STEREO OUT at the jack. Apply the button strip only after drilling the button holes (dashed circles).
